Dear Mistral Hiring Team,

I am writing to express my interest in the Software Engineer (Golang), Mistral Cloud and Software Engineer, Backend roles in Paris. I bring 10 years of software engineering experience spanning distributed systems, cloud infrastructure, payments and messaging, alongside experience as a co-founder and CTO.

At Customer.io, I maintain Go and .NET messaging services on GKE handling billions of daily API requests and contribute to the migration from .NET to Go. Previously, as co-founder and CTO of Cloudfeather Games, acquired by MPL, I built a Kubernetes game-server orchestrator, proxy and autoscaler for millions of users, reducing infrastructure costs by $500K annually. At Grab, I built a Go/Kafka settlement pipeline that processed more than 100,000 settlements in 15 minutes during its first production run.

This background aligns with the focus at Mistral on reliable, high-performance backend systems and scalable AI infrastructure. I would bring practical experience in Go, Kubernetes, Kafka, databases and observability, together with the ownership and product judgment developed through building a company and leading five engineers.

My interest in Mistral also comes from using its technology. In Xamine, my personalised question-paper tool, I used Mistral vision (mistral-small3.1:latest) for question detection. Other side projects include a voice-based AI diary and an automated AI video-generation pipeline. Building these applications has strengthened my ambition to become a subject matter expert in distributed systems and applied AI. Mistral offers a compelling opportunity to contribute my systems experience while deepening that expertise through production AI work.

I am seeking a role in Paris because my wife has accepted a position there, and my current employer does not permit employment in France. I applied for the Mistral Cloud role 10 days ago and have not yet received an update; I remain very interested in discussing how I could contribute.

Thank you for your consideration.

Regards
Yash Suresh Chandra
